

ICEM – Fire Risk Assessment

Aim:

The ICEM Fire Risk Assessment course aims to provide candidates the skills required to carry out Fire Risk Assessments and promote safer working practices related to fire hazards within their organization. The course helps experienced students by refreshing knowledge and providing updates on the latest techniques.

Course Overview:

The course develops the student's skills and knowledge and offers practical experience with a range of scenarios and fire situations. The practical nature of the course helps to improve the student's abilities and operational efficiency, and it builds confidence. Upon successful completion of the course, the student will have detailed knowledge and skills related to the following:

- Background to Fire Safety Legislation.
- What are the differences in the new approach to Fire Safety compared to previous approaches?
- Understanding of Fire.
- The Principles of Fire Risk Assessment.
- Dynamic Operational Risk Assessment.
- Documenting Findings.
- Practical Fire Risk Assessment.
- Understanding the roles and responsibilities of a Fire Risk Assessor in Fire Safety management.
- Understanding how to apply risk assessment principles in practice.
- The importance of documentation and record keeping.
